HP for Education

Guaranteed Future Value – the affordable way to keep your classrooms up to date.

Teaching best practice and learning outcomes are increasingly dependant on having modern and well equipped classrooms. With the rapid pace of technological change, it has never been more important to keep technology up to date.

But how do you decide on the best refresh strategy to optimise your budgets? The HP Guaranteed Future Value offer provides a convenient way to maximise the future resell value of your equipment and keep your classrooms fit for purpose.

How does Guaranteed Future Value help my school?

Your classrooms are kept up to date with appropriate devices to support the curriculum.

Your students and teachers always have access to current devices.

Your decision makers can refer to an online asset register to inform your purchasing decisions and optimise your technology budgets.

How does Guaranteed Future Value work?

You always know in advance the future value of the HP devices that you have registered for GFV.

Your guaranteed future values are likely to exceed all alternative means of disposal.

After 2 years, you can trade in devices at guaranteed values against the purchase price of new replacement devices.

Is my HP purchase eligible for Guaranteed Future Values?

Your school or educational establishment needs to be at Expert level to be eligible for GFV.

You can register your new devices for GFV when you submit your trade in claim.

GFV is not a finance offering, it only applies to equipment that your school or establishment purchases outright.
